About the SIA
New Products & Solutions Awards
sianps.com

The Security Industry Association (SIA) New Products & Solutions (NPS) Awards recognize innovative products and services in electronic physical security. As a trusted and valued source of information on the latest products and technologies, the NPS program introduces security professionals and end users to leading-edge security solutions.

NPS judges represent a carefully selected cross-section of security industry experts and are drawn from dealers, specifiers, end users, distributors and practitioners. Judges carefully review the NPS applications prior to ISC West. The day before the show opens, NPS participants present their entries to a panel of judges, who further add to their knowledge of entries when they explore the show floor the following day. After completing their unbiased and comprehensive evaluations, the judges select the best product or service in each category for which there is a sufficient number of entrants.

If you are a buyer or specifier of electronic or IT security equipment and would like more information about the 2022 NPS entries and their manufacturers, please visit www.sianps.com.

If you are a manufacturer, software or application development firm, service provider or any innovative company, please visit sianps.com or contact:

Cameron Walker-Miller
Associate Director of Standards and Technology, Security Industry Association

CATEGORIES

2022 SIA NPS Award Categories

With 36 category options, the SIA NPS Awards are designed to allow new products and solutions to compete directly with similar offerings. In addition to category awards, an overall Best New Product award is presented along with a Judges' Choice award!

- Access Control Software, Hardware, Devices & Peripherals – Wired
- Access Control Devices & Peripherals Hardware – Wireless
- Anti-Terrorism / Force Protection / Armed Aggressor
- Biometrics
- Commercial Monitoring Solutions
- Communications and Networking Solutions
- Convergence and Integration Solutions
- Data and Systems Cybersecurity
- Design, Diagnostic and Installation Tools
- Emergency and Mass Communication Systems
- Emerging Technologies
- Enhanced Project Delivery
- Environmental Monitoring Systems
- Fire / Life Safety
- Hosted Solutions
- Identification Management and Credentialing (Non-Biometric)
- Intrusion Detection and Prevention Solutions (Physical) – Wired
- Intrusion Detection and Prevention Solutions (Physical) – Wireless

- Key / Equipment Assets Management Solutions
- Law Enforcement / Public Safety / Guarding Systems
- Lock and Key Solutions
- Loss Prevention and Article Surveillance Solutions
- Managed Services
- Mobile Solutions (Connected)
- Mobile Solutions (Stand-Alone)
- Personal Protective Equipment
- Smart Home Solutions
- Threat / Risk Management Software Applications
- Unmanned – Drones & Robots for Security
- Unmanned – Drones & Robots for Detection / Protection
- Video Analytics
- Video Surveillance Advanced Imaging Technologies
- Video Surveillance Cameras
- Video Surveillance Data Storage
- Video Surveillance Hardware and Accessories
- Video Surveillance Management Systems

LETTER FROM THE CHAIR

Dear ISC West Attendees:

On behalf of the Security Industry Association (SIA) New Products and Solutions (NPS) Awards Committee, I would like to welcome you back to the ISC West trade show and conference. We are happy you could be here with us in person after two years of virtual SIA NPS programs, and we look forward to many more in-person events to come.

Aside from our return to a live in-person format, my fellow NPS Committee members and I believe this year is a turning point for the SIA NPS Awards, noting that the program has been rebranded to acknowledge the ever-growing number of software and service solutions that support the mission of our industry and that competition categories have been refreshed to do the same. Further, we have reintroduced a post-awards show program known as "Inside the SIA NPS Awards" that will provide added insights into the program process and its value to the participants and allow you to participate in shaping the program for the future.

The SIA NPS program was established over 40 years ago to recognize innovative products, services and solutions in electronic physical security and continues to stand as the industry's premier awards-based marketing program, where new and existing manufacturers compete to earn recognition awards in (36) categories and two top show awards. To that end, SIA, RX and the NPS Committee have sought to acknowledge the growth of the cybersecurity, Internet of Things, services and virtual/hosted solutions that have contributed so much to our industry's mission through continuous updates to the competition categories to reflect those trends.

I invite you to visit the SIA NPS Awards display area on the ISC West Exhibit Floor to see the products and services competing this year and to attend the SIA NPS Awards Ceremony on Wednesday, March 23, at 3:30 p.m. on The Bridge Stage – Booth #20073, where we will honor the winners in each category, announce our selection for this year's Merit Award and present the Judge's Choice and Best New Product awards for 2022. I would also invite you to attend the Inside the SIA NPS Awards program on Thursday, March 24, at 1:00 p.m., also on The Bridge Stage – Booth #20073, where we will have a panel discussion with winners, past entrants, judges and NPS Committee members to provide more insights about the program and answer your questions.

In closing I would like to thank everyone from SIA, RX and the NPS Committee who helped organize the show this year, the manufacturers and integrators who are participating in the program and especially our volunteer judges who contribute so much to the success of the program.

Be safe, be healthy and enjoy the show.

Sincerely,

Christopher P. Grniet, CPP
Regional VP – Guidepost Solutions
Chair, SIA New Products and Solutions Awards Committee

2022 SIA NPS JUDGES

The SIA NPS Committee, SIA and RX extend our appreciation to the 2022 judges who have graciously volunteered their time and shared their expertise.

Actuate
Workplace Fall and Injury Detector
Category: Video Analytics

Actuate enables existing security cameras to automatically identify slip and fall incidents reliably and accurately. With this ability, property and facilities managers can: - Render immediate aid to building occupants who have fallen and are injured. - Identify potential hazardous areas (e.g. wet spots and "black ice") to proactively mitigate and prevent future falls - Retain all evidence of slip & fall incidents that occur within a camera's field of view.

Aiphone
IX-DVM Mullion-Mount IP Video Door Station
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

The IX-DVM is a mullion-mount IP video door station that is weather and vandal resistant. Mounting in spaces as thin as 2 inches, the station contains a contactless call sensor for touchless call-in, is equipped with 720p HD wide dynamic range camera that can be streamed to third party devices

Aiphone
Two-Way Video Technology
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

With the integration of two-way video in IP video intercoms, we can ensure more effective communication while meeting ADA regulations. Deaf personnel and visitors can see each other; two-way video allows sign language to be seen between the entrance station and the guard station.

Aiphone
IX-MV7-HW-JP
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

The IX-MV7-HW-JP is an IP addressable hands-free or handset master station with a 7" color touchscreen. It can be wall or desk mounted (desk stand included).

Alarm.com
Pro Series Cameras by Alarm.com
Category: Video Surveillance Cameras

Alarm.com Pro Series commercial-grade PoE cameras are built to accommodate any indoor or outdoor commercial application. The new cameras are NDAA compliant*, 24/7 onboard or SVR options, and enable use of Alarm.com's exclusive software: Business Activity Analytics. Camera features and options also include commercial-grade varifocal lenses and 4MP recording quality.

AlertEnterprise Inc.

Guardian Policy-Based Access Control
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

Guardian Policy-Based Access Control (PBAC) from AlertEnterprise is the industry's first cloud dynamic authorization service for zero trust physical access. With Guardian PBAC, security teams can deliver secure employee access according to individual work schedules – as well as assign seniority-based access privileges for physical spaces in real-time at the door. And the best part? Organizations can keep their existing PACS and avoid the rip and replace hassle.

Allegion - LCN

LCN 6400 COMPACT Auto Operator
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

The LCN 6400 COMPACT Series low energy automatic operator helps your facility meet basic needs related to accessibility and touchless access on interior openings. Whether you are upgrading a single opening, renovating a portion of your building or constructing a new facility, the COMPACT series enables a healthy, accessible environment.

Alula

Alarm Verification Services
Category: Mobile Solutions (Connected)

Alula Alarm Verification Services and Messenger are capabilities that have been added to the Alula Platform. These capabilities make it immediate and easy for system users to quickly and conveniently collaborate regarding real-time system notifications. Find out if someone accidentally set off an alarm or if immediate response is needed.

ARGUS Perimeter Security Solutions

ARGUS LuxGuard
Intrusion Detection and Prevention Solutions (Physical) - Wireless

ARGUS LuxGuard sensors combine the elegance of high-end landscape lighting with a fully functional ARGUS security system.   The LuxGuard utilizes RF-based sensors to detect intruders. Upon triggering, the LuxGuard's lights will flash red, indicating intruder locations. Optional cameras can capture photos of intrusion events, providing confirmation and identification of threats.

ASSA ABLOY (HES)

HES KS200|KS210 Series Server Cabinet Locks
Access Control Software, Hardware, Devices & Peripherals – Wired

The KS210 integrated access control OSDP server cabinet lock offers enhanced security communications, monitoring, and credential options with RS-485 OSDP and BLE technology. Now on the GSA FIPS 201 Evaluation Program Approved Product List (APL), the KS210 offers a smarter way to protect mission-critical data and equipment across the enterprise.

Avigilon
Artificial Intelligence Network Video Recorder
Category: Video Surveillance Data Storage

The Artificial Intelligence Network Video Recorder (AI NVR), an enterprise-hardened recorder, offers cloud-ready security solutions beyond recording and storage. The AI NVR provides single-click remote upgrades, supports license plate scans for over 50 lanes, server-side analytics on any third-party camera or non-analytic avigilon camera, and cybersecurity through Avigilon Hardened OS.

Axis Communications, Inc.
AXIS Perimeter Defender
Category: Video Analytics

AXIS Perimeter Defender enables high-security, scalable perimeter protection, providing an edge-based analytics system that automatically detects and responds to intruders upon a site. It saves money and time by leveraging artificial intelligence in training models to reduce configuration time from ~an hour to seconds with the click of a button.

Axis Communications, Inc.
AXIS Device Manager Extend Base
Category: Design, Diagnostic, and Installation Tools

AXIS Device Manager Extend Base is a cloud-based software application which provides a user-friendly interface for discovering, monitoring and operating Axis devices, suited for multisite environments. This free application offers instant awareness of all user Axis device inventory on all user sites, from anywhere.

Axis Communications, Inc.
ARTPEC-8
Category: Video Surveillance Advanced Imaging Technologies

Axis' ARTPEC-8 system-on-chip (SoC) is designed in-house by Axis specifically for network video. It powers all sorts of formidable analytics applications based on deep learning on the edge, as well as enables an array of remarkable capabilities and features including superior imaging, enhanced cybersecurity, and powerful compression.

BioConnect
BioConnect Trust Platform for Small Spaces
Category: Key / Equipment Assets Management Solutions

Extend your existing access control system into whatever places require monitoring access or controlling the movement of goods. Existing users and credentials work online, inside vehicles and even off-line – and you can add additional security through the industry's largest integrated array of physical, digital and mobile-based authentication.

Bosch Security and Safety Systems

G Series Intrusion Control Panels with Mass Notification System Digital Public Address Support
Category: Intrusion Detection and Prevention Solutions (Physical) – Wired

The Bosch G Series is the standard for commercial burglar and fire alarm and integrated access control, delivering complete security and ease-of-use. G Series is now the first panel to meet UL2572 requirements for mass notification. G Series provides control, visual annunciation and central station reporting for mass notification applications.

Bosch Security and Safety Systems

FLEXIDOME IP 8000i - X series
Category: Video Surveillance Cameras

FLEXIDOME IP 8000i - X series fixed cameras deliver enhanced image quality for low-light scenes and fast-moving objects with HDR X and starlight X technologies. With remote configuration and commissioning, installers can adjust the pan, tilt, roll, and zoom to set the field of view without a ladder or lift.

Bosch Security and Safety Systems

Bosch Security Manager
Category: Mobile Solutions (Connected)

Bosch Security Manager is a mobile application designed to enhance the user experience of Bosch intrusion control panels. It features a modern user interface that allows users to control and manage their alarm systems, including arm and disarm, adding and deleting passcodes, reviewing event history and managing push notifications.

Calipsa

Calipsa Pro Analytics
Category: Video Analytics

Calipsa Pro Analytics is a suite of advanced AI cloud video analytics for real-time and forensic analysis. With 3 new products, features include scene change detection, loitering detection, crowd forming and forensic video search. Unlike other advanced video analytics, Calipsa analyses frames, not video, saving time and bandwidth for users.

CyberLock Inc.
ValidiKey Ring
Category: Key / Equipment Assets Management Solutions

ValidiKey Ring is a mechanical key management tool for CyberLock ValidiKey vaults. ValidiKey vaults securely store CyberKey smart keys until they are issued to authorized users via PIN or RFID credentials. ValidiKey Ring retains the Cyber-Key tip form factor, with an attached keyring for securing mechanical keys. At the vault, users input their credential to check out their assigned mechanical keys. An audit trail event is recorded when the ValidiKey Ring is removed and returned.

CyberLock, Inc.
Flex II FlashReader Keypad
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

The Flex II FlashReader Keypad is an input device for the CyberLock Flex II hardwired access control system. The FlashReader Keypad supports six different credential types, RFID cards, CyberLock's Flash technology, access number, IR via fob or Cyber-Key, and Bluetooth 5.0 via the CyberAccess app. Additionally, access can be granted automatically when a user is within range of the door, enabling hands-free access.

CyberLock, Inc.
CyberAudit Web 9.5
Category: Key / Equipment Assets Management Solutions

CyberAudit-Web (CAW), the software suite for managing CyberLock systems, provides an intuitive interface to assign keys, set expirations, configure access schedules, and more. The latest release, CAW 9.5, introduces user interface up-grades, integration with Google Maps, and powerful capabilities for CyberLock's new ValidiKey Ring and Flash Keypad Reader. Additionally, CAW 9.5 offers new audit and reporting capabilities, making it even easier to track and manage every item in a given CyberLock system.

Databuoy Corporation
Geofob™ Mobile Panic Button
Category: Emergency and Mass Communication Systems

Geofob™ instantly provides a user's identity and their exact location. With one press, Geofob provides all of the benefits of the Databuoy® Know When It Counts® application, including video integration, and optional audio. Geofob can deliver room-level location accuracy and is perfect for use in hospitality and edu-cational institutions.

Dell Technologies
Dell Validated Design Solution for Computer Vision
Category: Convergence and Integration Solutions

This solution enables organizations to provide a seamless integration across video management, video analytics and edge while embedding cyber security protection with XDR and VDR capabilities for end point devices. It allows ingest of video and edge data once and applies multiple computer vision applications to develop actionable insights.

dormakaba USA, Inc.

Argus Air
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

dormakaba's Argus Air eGate solutions for airports and airlines ensure efficient passenger flow. For use with most biometric scanners, they provide the security required at airports to control access to security checkpoints, airline lounges and airplane boarding. They cover the most important touch points in the passenger process from end-to-end.

Evolv Technology

Evolv Express®
Category: Law Enforcement / Public Safety / Guarding Systems

Evolv accelerates security screening and maintains the highest degree of weapons detection accuracy. It eliminates the friction that fans, patrons, students and more experience moving through security by with touchless screening. This reduces the security risk of crowded security lines and drastically reduces false alarm rates and guard errors.

Gallagher

Gallagher security for SMB
Category: Mobile Solutions (Connected)

Gallagher security for SMB is a cloud-based solution designed to satisfy the needs of small to medium business owners by providing the freedom to manage their security from anywhere, anytime, all from their smartphone. With intruder alarm, user management, access control, multi-site functionality, and monitoring capabilities, business owners can be confident their site is secure, no matter where they are. It is simplified security, using the latest in cloud technology.

Genea

Genea Cloud Access Control - Global Dashboard and Badge Printing
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

Global Dashboard is a new product on the Genea Access Control Platform. With this addition, Genea delivers a quick and effortless way for security professionals to maintain visibility and control of their access control systems that are distributed across multiple sites. Perfect for both large and small organizations, this new release brings a single operational console that allows easy alert management, user activity insights and hardware status, employee badge printing and more.

Hakimo

Hakimo Alarm Monitoring 2.0
Category: Commercial Monitoring Solutions

Hakimo Alarm Monitoring 2.0 uses AI to solve the top two problems faced by monitoring stations and SOCs: access control false alarms and tailgating detection. Hakimo reduces false alarms by 80%+, has the best tailgating detector in the industry with <1% false positives and provides an integrated commercial monitoring solution.

2022 SIA NPS ENTRIES

i3 International
i3's Ai Cloud
Category: Hosted Solutions

i3's Ai cloud allows users to leverage their existing CCTV infrastructure to securely send outbound data for analysis in the cloud. Using our CMS (Cloud Managed Services), users can access this Ai data and take immediate action to help secure & optimize their location.

IronYun Inc.
Vaidio AI Vision Platform 6.0
Category: Video Analytics, Convergence and Integration Solutions

The Vaidio AI Vision Platform offers 30 AI -enabled next-generation video analytics functions for security, safety, access control and operational applications. Vaidio is an open platform that works with any IP camera, scales from 1 to 1,000s of cameras, and integrates with dozens of market leading VMSs and chemical and audio sensors for holistic situational awareness. Vaidio reduces false alerts up to 99.995% and reduces hardware requirements relative to competitive alternatives by 50%.

JNL Technologies Inc.
Quantum AI, Sensing by Vayyar
Category: Convergence and Integration Solutions

Quantum AI using Vayyar, a state-of-the-art technology, in use across multiple industries utilizes a camera-free, 4D imaging radar sensor. When coupled with Quantum's robust analytics and alerting engines the combined solution can identify changes in daily activity patterns to detect and reduce the number of falls in senior living environments.

LEGIC Identsystems (wholly owned subsidiary of dormakaba)
LEGIC Connect Go
Category: Mobile Solutions (Connected)

LEGIC Connect Go is a cloud service that boosts market entry into the mobile world. Built as an easy-to-use, 24/7 online store for credential data, it allows the preparation and launch of backend-less, mobile-app based services such as access control for buildings, vehicles, lockers, printers and much more. It gives users mobile access to virtually any service – they simply request and use their credentials on demand, anywhere and anytime. LEGIC takes care of it!

LifeSafety Power
SD16 Smart Output Board
Category: Design, Diagnostic, and Installation Tools

The SD16 provides the information currently missing in a managed access power solution. Not just limited to the power supply and locks, systems with the SD16 can now give real-time power status and remote power cycling ability to the access control panels, readers, cameras, REX, and other auxiliary devices.

LiftMaster

Smart Access Hub
Category: Access Control Devices & Peripherals Hardware – Wireless

The Smart Access Hub provides residential communities with an affordable retrofit solution, adding sophisticated cloud-based security and access to existing entry systems and access control hardware. A great option for community managers that want additional functionality and benefits of myQ Community's cloud-based web platform, but already have an entry system.

LiftMaster

myQ Community Web Platform + Mobile App 2.0
Category: Mobile Solutions (Connected)

myQ Community is a cloud-based platform unique to LiftMaster's access controls. Residents can unlock entrances, visually identify guests and share virtual guest passes through the myQ Community app. The myQ Community Web Platform lets property managers monitor/control property access from a single dashboard with 24/7 video monitoring and real-time alerts.

Medeco

Medeco CLIQ Local Manager
Category: Lock and Key Solutions

Medeco CLIQ Local Manager is locally-installed software for small- and medium-sized businesses that administer the electromechanical Medeco CLIQ key system.   Customers get flexible access, key management, auditing, security, data protection, and a cost-efficient solution. Medeco CLIQ combines the benefits of a mechanical and access control system in a retrofit cylinder.

Medeco

Medeco XT Intelligent Key Cabinet V2
Category: Key / Equipment Assets Management Solutions

The IKC is an XT Integrated, electronically-controlled key control and distribution solution. XT Keys are stored unprogrammed for added security and are only active when and where they are needed. For added convenience, all key access is controlled through the XT Web Manager integration.

Nexkey

Nexkey Core II
Category: Access Control Devices & Peripherals Hardware – Wireless

Nexkey Core II transforms any type of mechanical lock, door, cabinet, or locker into a smart, cloud-connected device, able to be managed and unlocked via a smartphone. Install in minutes and the battery lasts for years. Customers can easily manage access for thousands of users, maintaining a real-time audit log.

Pelco

Sarix Multi Pro
Category: Video Surveillance Cameras

Providing multi-directional coverage and flexible mounting options, the Sarix® Multi Pro camera series allows you to gain total coverage across 180, 270 or 360-degree field of view from a single vantage point. NDAA compliant, this camera is ready for open connectivity with Pelco VideoXpert and leading third-party VMS'.
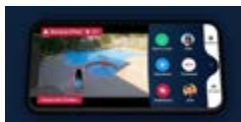

Premio Inc.

RCO-6000-CFL Series AI Edge Inference Computer
Category: Video Surveillance Data Storage

The RCO-6000-CFL AI Edge Inference PC series' unique 2-piece modular design offers tailored performance flexibility from CPU,GPUs, m.2 accelerators, and even NVMe storage technology. The top computer node provides full I/O access to an industrial fanless PC, while the bottom node is dedicated for new EDGEBoost nodes.

Provision ISR

PoolScout
Category: Smart Home Solutions

PoolScout identifies unsafe scenarios and raises relevant alerts to enhance pool safety. Using video analytics and A.I., PoolScout detects and distinguishes toddlers from adults, pets, and other objects in and around the pool. The App shows your pool Live Stream in real-time, giving reassurance that the pool is safe.

Quanergy System, Inc.

QORTEX DTC™ 3D LiDAR Perception Software (physical) -wired
Category: Intrusion Detection and Prevention Solutions (Physical) – Wired

QORTEX DTC™, the brains of Quanergy's 3D LiDAR Flow Management Platform generates real-time rich data including location, direction, speed and classification of objects. The rich 3D actionable data can be used to build powerful analytics and business intelligence tool to monitor and automate critical processes for security & surveillance protection.

Rajant Corporation

Rajant Peregrine LTE BreadCrumb®
Category: Communications and Networking Solutions

Rajant's Peregrine LTE is a high-performance BreadCrumb equipped with LTE capabilities, allowing agile, reliable machine-to-machine and peer-to-peer communications. It is interoperable with all Rajant legacy networking and part of Rajant's initiative to develop deeply integrated solutions that securely combine data from connected people, vehicles, machines, and sensors, with machine learning.

Resecurity, Inc.

Resecurity Risk™
Category: Threat / Risk Management Software Applications

Time is our most valuable resource in cybersecurity. Leverage Risk™ to automate your threat and risk management and receive insight about any significant changes to your security posture due to Dark Web, data breach, compromised credentials, network infections and other security incidents. Risk™ provides the contextual insight from outside of your firewall. Single pane glass to monitor what's important to you from both business and technology perspective.

RightCrowd

RightCrowd Access Analytics
Category: Threat / Risk Management Software Applications

RightCrowd Access Analytics deploys cybersecurity technology to the threat of inappropriate physical access. With a fast time-to-value, it identifies people's inappropriate access to security systems and all physical locations. Security can easily map, measure, and monitor access risk daily, enabling proactive control of insider threat and Access Chaos.

RTAI PRINTERS

Holo-Met Print-On-Demand Visual Security
Category: Identification Management and Credentialing (Non-Biometric)

Colors become visible by aborption and reflection of different wave lengths of light. Holo-Met print-on-demand visual security uses RTAI 600 desktop ID printer retransfer technology to transfer silver metallic ink in concert with dye-based Yellow, Magenta Cyan (YMC) color inks to produce a brilliant 600 dpi holographic-like security image on-demand.

Seagate Technology

Exos® CORVAULT™
Category: Video Surveillance Data Storage

Exos® CORVAULT™ is a uniquely self-healing, disk-based block storage system that delivers best-in-class price/performance, ultra-dense, multi-petabyte capacity, dependable five-nines availability and hyperscale-class efficiencies. CORVAULT incorporates the industry's most innovative drive, chassis, security and data-integrity technologies – all designed and built by Seagate, the storage industry leader for over 40 years.

Senstar

Senstar Symphony Sensor Fusion Engine
Category: Intrusion Detection and Prevention Solutions (Physical) – Wired

The Senstar Symphony Sensor Fusion Engine is a breakthrough technology that synthesizes data from separate systems to generate actionable information. More than just simple Boolean logic, the sensor fusion engine accesses low level data to characterize potential risks. Data synthesis enables levels of performance that exceed those of individual sensors.

Siklu

MultiHaul TG Node N366
Category: Communications and Networking Solutions

MultiHaul™ TG N366 is Terragraph certified, and applies the most advanced and modern radio physical and MAC layers for long range access in the 60GHz spectrum. Standard compliance: •IEEE802.11ay-Wireless LAN Medium Access Control (MAC) and Physical Layer (PHY) Specifications. •Wireless network is built upon a modern future-proof wireless interface, designed from the ground up for the unique characteristics of the 60GHz spectrum. •A well thought feature-rich wireless interface, supporting the needs of surveillance applications.

STid

SPECTRE nano - UHF & Bluetooth Long Range Compact Reader
Category: Access Control Software, Hardware, Devices & Peripherals – Wired

Versatile, convenient, secure and extremely compact… SPECTRE nano Reader improves the user experience while securing and eliminating vehicle access lines. It offers hands-free identification of visitors, employees, vehicles or both at a glance, even in the most challenging environments. It supports a smooth access control experience without compromising on security.

Teledyne FLIR

FLIR FH-Series ID
Category: Video Surveillance Advanced Imaging Technologies

FLIR FH-Series ID are ruggedized, multispectral fixed cameras that integrate industry-leading thermal imaging with 4K visible imaging for perimeter intruder detection. Built-in FLIR Virtual Barrier artificial intelligence-based analytics detect/classify multiple threats at various speeds. Custom scheduling enables intrusion analytics to run on visible or thermal, depending on time of day.

Touchless Biometric Systems

TBS 3D FLY
Category: Biometrics

TBS 3D FLY is a touchless biometric hand-scanner with superior sensor technology that identifies a person within a second. Users can present their hands to the 3D FLY whilst walking towards the speed gate without stopping or slowing down. This consent-based touchless biometric technology offers a true on-the-fly identification experience.

Turing AI

Turing AI - Mobilized Video Security Platform
Category: Mobile Solutions (Connected)

Turing Vision is the leading safety and security video platform. It's AI-enabled, cloud-based platform allows you to search, be alerted, and analyze detection patterns across multiple locations. Connect Turing Guard robot along with new/ legacy IP cameras to the Turing Vision AI platform for a 360 degree view of your security.

UFO Security

STINGFOG
Category: Emerging Technologies

STINGFOG stops burglar intrusions ejecting a super fast dry fog enriched with irritating substances bypassing the limits of "optical fog machines" and "OC sprayers" and joining their combined advantages, introducing a new concept: the Security- Irritating Fog Generator that end users can manage ad refill by themself!

UNIONCOMMUNITY Co.,Ltd

UBio-X Triple
