

Countdown to ISC West: 80 Days

ISC West is back! To celebrate, ISC News Editor-in-Chief DJ Murphy is conducting a series of interviews with organizers, speakers, sponsors and partners in the security space who just can't wait to gather again in person.

Gagliano will deliver the keynote address at ISC West on July 20 at the Sands Expo in Las Vegas.

A promotional banner for StarLink Fire. On the left, there is a photo of a firefighter in full gear working in a smoky environment. The text reads: "Don't Wait Until It's Too Late". To the right of the photo, the text says: "Replace POTs on All FACPs: & Upgrade Sunsetting Radios to StarLink Fire". Further right, it says "from \$4995 net" and shows two red StarLink Fire communication devices. There are also small logos for PRRS and a circular logo at the bottom right of the banner.

New Workplace Safety Standards Under Review

Emergency workplace safety rules from the Department of Labor were released this month. The rules aim to prevent the spread of the coronavirus and protect workers from the virus as they increasingly return to in-office working arrangements. The new regulations would put in place a set of workplace safety requirements businesses must follow.

The Office of Management and Budget is set to review the rules before they are released publicly and go into effect.

Officials have not said how long the review will take, but the process...

New Guide Offers Analog-to-Cloud Upgrade Advice

The need for remote access because of workplace trends accelerated by the pandemic may be pushing more businesses to consider cloud video surveillance technology. Recent figures from cloud video surveillance provider Eagle Eye Networks finds that analog cameras to the cloud grew in 2020 after four years of decline. The company says this is likely driven by improvements in encoder technology and the need for increased remote video capabilities and views during the pandemic.

Eagle Eye has released a best-practices guide, "Analog Video to Cloud," for businesses interested in learning more on upgrading...

Safe and Smart Transportation: How Computer Vision, VMS Capabilities and AI Create Safer and Smarter Travel

Sponsored by: Dell Technologies

Wednesday, May 12, 2021

1:00 PM ET

Transportation revolves around the passenger experience and their safety.

Regardless of the mode of transport, from airports to railways, subways, buses ferries, ports, and all mass transit – every transportation organization must keep its customers satisfied. To achieve this, they must endeavor to move passengers to their destinations as quickly as possible, but equally critical to the passenger experience is ensuring the physical security and safety of travelers and transit hubs.

Join Dell Technologies and Genetec to learn how together we integrate innovative technologies, advanced analytical capabilities, and end-user-focused solutions to deliver faster, safer, and more economical experiences for travelers and real-time revenue management for governments, transportation agencies and authorities.
