

## SURVEY FINDS US EMPLOYEES LACK UNDERSTANDING OF EMERGENCY PROCEDURES

A new survey of employees at businesses around the United States uncovers a lack of understanding of emergency procedures.

The fourth annual 2021 Workplace Safety and Preparedness Survey, conducted by Rave Mobile Safety, finds a third of respondents said they were not aware of or not sure about emergency plans for certain emergency incidents, with most “no/not sure” responses for emergency plans related to active shooter incidents, cyberattacks/system outages and workplace violence.

The survey also found workplaces are not practicing for events like medical emergencies and severe weather. Thirty-seven percent of respondents said that...

## Countdown to ISC West: 35 Days

ISC West returns to Las Vegas at the Sands Expo from July 19-21. To celebrate, ISC News Editor-in-Chief DJ Murphy is interviewing organizers, attendees, sponsors and partners in the security space.

PSA Security Network is an important partner in the educational program at ISC West. This year, PSA is back sponsoring a track of sessions on topics specifically tailored for integrators, including leadership, the importance of managed service offerings and accounting for cyber risk. Murphy sat down with PSA's Anthony Berticelli to talk about trends the group is seeing and the importance of meeting face-to-face again.

## Networking in Harsh Conditions

*Sponsored by ComNet*

Your security network physical connection is often overlooked and, many times, taken for granted when setting up a comprehensive security system. After all, it's the cameras, access control, and intrusion devices that are the key elements to any successful system, isn't it? With all this information passing from device to headend, though, how does it get there every second of every day?

When your security network is confined to a comfortable building with stable heating and cooling, protection from moisture and rough treatment, it's a lot easier to choose the equipment that keeps all that data moving. But if you are securing an outdoor area, there are many parameters that need to be accommodated...

## ISC News Quarterly Virtual Event

**Wednesday, June 23 | Protecting Critical Infrastructure**

Focusing this quarter's theme on **Protecting Critical Infrastructure**, join us for our second quarterly virtual event taking place on **Wednesday, June 23**. Effective attacks on critical infrastructure can cause a cascading impact to the lives of thousands -- or even millions -- of human beings, potentially disabling and dismantling communities, entire cities and even the entire nation for days, weeks and months on end. During this event, you will hear from leaders in the security industry discussing the latest technologies being introduced into the critical infrastructure sector.
