

## Hack Highlights Vulnerabilities in Connected Security Devices, Industry on Guard

Reports say hackers managed a significant breach of security-camera data from Verkada, a San Mateo, Calif.-based provider of connected security systems.

A report first published by Bloomberg News claims hackers obtained illegal access to the live feeds of 150,000 surveillance cameras in many businesses, police departments, prison, schools and hospitals. Some of the feeds are from high-profile names, including carmaker Tesla and software provider Cloudflare.

The report says the criminal group involved was able to see images from inside women's health clinics, psychiatric hospitals and Verkada's offices.

An anti-corporate hacktivist group calling itself APT-69420 is claiming responsibility for the attack. The group, based in Switzerland, claims it accessed...

### **New Bill Seeks to Give CISA Larger Role in Critical Infrastructure Protection**

On the heels of an unsuccessful attempt to hack into a water treatment facility in Florida, a newly introduced bill seeks to protect critical infrastructure from cyberattacks and give more authority to the Cybersecurity and Infrastructure Security Agency (CISA) to protect these kinds of systems.

Introduced by Rep. John Katko (R-N.Y.), The DHS Industrial Control Systems Enhancement Act of 2021 is a bipartisan effort to enhance CISA's role in protecting critical infrastructure and would amend the Homeland Security Act to require...

### **FEATURED WHITE PAPER: How Are Secure Buildings Changing in a Post-Pandemic World?**

We're all seeing how building design is changing as a result of the recent pandemic. But, what is the impact of these changes on physical security measures, namely the ability to control unauthorized entry due to tailgating? As "touchless entry" and "social distancing" become essential in building designs, how will architects and security professionals alike address these changes while upholding building security?

**Learn the answers to these questions and more when you download Boon Edam's free whitepaper today.**
